

Careers Information for Schools and Colleges

Online at www.oxlepskills.co.uk

OxLEP Skills has launched a new website that includes careers information that will support you to develop a **progressive careers programme** that **inspires** your students. You will find lots of useful information including support for **young people with SEND**, archived copies of **Picks of the Week** and links to key resources from **The Careers & Enterprise Company**. Below are a few examples of how the new site can support your work.

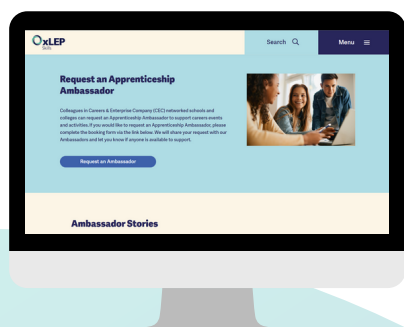

Employer engagement

Publish opportunities for employers to volunteer their support for a variety of careers activities. Opportunities will be posted on the website and shared with registered employers. Also discover **careers events** hosted by local employers.

Local Resources

From **Labour Market Information (LMI)** to **lesson plans** and support for the **curriculum**, discover the local resources we have created for schools and colleges to aid the delivery of careers across Oxfordshire.

Apprenticeship Ambassadors

Request one of our Apprenticeship Ambassadors, current apprentices who **support** our work to **raise awareness** of the range of apprenticeships on offer by sharing their experiences.
